Prerequisite Required - Blood Born Pathogens Certificate

What You Will Learn

During this one-day course, students will develop a strong understanding of:

- Skin anatomy and hair growth cycles
- How dermaplaning works and who it is suitable for
- Indications, contraindications, and client selection
- Proper blade handling, angles, and stroke techniques
- Infection control, safety protocols, and risk management
- Post-treatment care and client education

Hands-On Training

This course includes **live, supervised hands-on dermaplaning treatments**, allowing students to:

- Perform full client consultations and skin assessments
- Practice correct blade angle, pressure, and tensioning
- Treat facial contours safely and effectively
- Build confidence through real-time instructor feedback

Advanced Techniques & Treatment Integration

Students will also learn how to:

- Perform full-face and targeted dermaplaning treatments
- Customize treatments for different skin types
- Integrate dermaplaning into facial protocols and add-on services
- Understand safe treatment frequency and maintenance

Who This Course Is For

This course is ideal for:

- Aestheticians and medical aestheticians
- Nurses and nurse injectors
- Aesthetic practitioners and clinic owners
- Beginners

(Scope of practice may vary by province and professional designation.)

Certification

Upon successful completion, participants will receive a Dermaplaning Certificate of Completion, confirming hands-on training and competency.

What's Included

- In-person expert instruction
- Hands-on dermaplaning training with live models
- Treatment protocols and safety guidelines
- Client consultation, consent, and post-care templates
- Certificate of completion

Why Train With Skin Aesthetics Canada

Our training emphasizes clinical safety, ethical practice, and real-world application. Students leave with the confidence, skill, and professional understanding required to deliver safe, effective dermaplaning treatments within their scope of practice.
