

2-Day In-Person Microneedling Certification Course

Including RF Microneedling Theory

Our **2-Day In-Person Microneedling Certification Course** is designed for aesthetics professionals looking to build confidence, technical skill, and clinical understanding in both **traditional microneedling** and **RF microneedling**.

This comprehensive training combines **evidence-based theory**, **hands-on practice with live models**, and **advanced device education**, ensuring students leave with the knowledge and practical experience needed to safely integrate microneedling into their practice.

COURSE FEE 1999.00 PLUS HST – KIT INCLUDED

KIT INCLUDES:

- 11 x A20 Dr Pen Heath Canada Approved Device
- 1 x Needles
- 1 x Zenza Numbing Cream
- 10 x Sheet Masks
- 1 x Jelly Mask (Good for 30 Clients)
- 1 x Pack Dental Bibs
- 1 x Pack of Gloves
- 1 x Pack of Gauze
- 1 x Tub Cavi wipe
- 1 x Barrier Tape
- 1 x Pack Clip cord Sleeve
- 1 x Manual

Prerequisite Required - Blood Born Pathogens Certificate

What You Will Learn

Over two full days, participants will gain a strong foundation in:

- Skin anatomy and wound-healing physiology
- Client consultation, contraindications, and treatment planning
- Microneedling techniques for aging, texture, acne scarring, and pigmentation
- Proper needle depth selection by treatment area
- Infection control, safety protocols, and post-procedure care
- Advanced microneedling protocols and combination treatment theory

Hands-On Training

This course includes **live, supervised hands-on microneedling treatments with two models**, allowing students to:

- Perform full client consultations and skin assessments
- Practice proper technique, pressure, and pass patterns
- Adjust needle depth safely and effectively
- Gain real-world treatment confidence under expert guidance

RF Microneedling Theory Module

In addition to standard microneedling, students will receive **in-depth theoretical education in RF Microneedling**, including:

- Differences between traditional microneedling and RF microneedling
- How radiofrequency energy interacts with the skin
- Insulated vs non-insulated needles
- Safety considerations, contraindications, and risk management
- Treatment planning, spacing, and expected outcomes

*RF Microneedling is taught as a **theory-based module only**. No live models are used for this portion of the course.*
